

Project Design Phase-I

Solution Architecture

DATE	11 October 2022
TEAM ID	PNT2022TMID16807
PROJECT TITLE	Web Phishing Detection

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- ❖ Find the best tech solution to solve existing business problems.
- ❖ Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- ❖ Define features, development phases, and solution requirements.
- ❖ Provide specifications according to which the solution is defined, managed, and delivered.

OUR PROPOSED ARCHITECTURE :
